

<b>Presenter</b>	<b>Poster title</b>	<b>Nr</b>
A. Ainelo	The toxin GraT disturbs ribosome biogenesis	1
K. Ainsaar	Dual role of TonB3-PocAB system of <i>Pseudomonas putida</i>	2
L. Bankovska	Genetic variability study of <i>Osmoderma barnabita</i> (Coleoptera: Scarabaeidae) subpopulations in Latvia in perspective for conservation biology	3
M. Basakirskaitė	Association between Fibrilin1 polymorphisms (rs2118181, rs10519177) and Transforming Growth Factor $\beta$ -1 concentration in human plasma	4
S. Bogačiovienė	Genetic diversity of <i>Vaccinium corymbosum</i> , <i>V. australe</i> , and <i>V. angustifolium</i>	5
O. Burimski	Spatio-temporal genetic structure of Estonian sea trout ( <i>Salmo trutta</i> ) populations in the Gulf of Finland	6
O. Fokina	Investigations of populations of <i>Perca fluviatilis</i> of Latvian and Lithuanian reservoirs by retrotransposon-based molecular markers	7
M. Galdikas	Genetic characteristic of <i>Dermacentor reticulatus</i> ticks using microsatellite data	8
U. Gyvyte	MicroRNA expression profiling of human gastrointestinal stromal tumors	9
S. Hausenberg	YbeY and RNase R in Ribosome Degradation	10
H. Hermann	The function of microRNA-146 family in the regulation of proliferation of keratinocytes and psoriasis	11
T. Ilmjärv	Mutagenic processes in environmental strains of pseudomonads	12
A. Ivanova	Hepatitis E Virus in Domestic Pigs, Wild Boars, Pig Farm Workers, and Hunters in Estonia	13
I. Jahundoviča	Genetic variability of <i>Trichinella britovi</i> isolates of wildlife animals in Latvia	14
M. Jõesaar	<i>Pseudomonas pseudoalcaligenes</i> C70 harbours redundant catechol 2,3-dioxygenase genes	15
A. Karkliņš	Genetic and morphological variation of Sea trout <i>Salmo trutta</i>	16
R. Kiiker	Highly diverse sexually reproducing late blight pathogen population from Estonian potato fields	17
V. Kirillova	<i>Sarcocystis</i> species identification in muscles of wild canids from Latvia using molecular biology techniques	18
M. Kirjušina	Short report: DNA extraction of European eels from Latvia to detect genetic variability using microsatellites	19
N. Krasņevska	Genetic analysis of Latvian <i>Ligularia sibirica</i> populations	20
E. Kuncevičienė	Association study of <i>GJD2</i> and <i>RASGFR1</i> genes single nucleotide polymorphism with myopia in Lithuanian twin population	21
E. Kupčinskienė	Choosing the amplified fragment length polymorphism markers for evaluation of genetic variability of <i>Impatiens parviflora</i>	22
E. Kupčinskienė	Molecular diversity comparisons between three <i>Impatiens</i> species growing besides	23
S. Kuusienė	Characterization of hybrid aspen albino plantlets regenerated in tissue culture	24

A. Lahesaare	Fis is binding to the <i>lapF</i> promoter <i>in vitro</i> and represses the expression of LapF in <i>Pseudomonas putida</i>	25
S. Lilleorg	On ribosome heterogeneity on the example of <i>E. coli</i> r-protein L31	26
A. Menert	Characterization of waste wood compost microbial community with culture-dependent and culture-independent techniques	27
I. Metsik	Evolution of bacterial populations in <i>m</i> -cresol-containing environment	28
K. Mikkel	NHEJ enzymes LigD and Ku participate in stationary-phase mutagenesis in <i>Pseudomonas putida</i>	29
H. Moor	Fis affects <i>P. putida</i> biofilm formation <i>via</i> regulation of the LapA/ LapF ratio	30
K. Morkūnienė	Genomic selection in dairy cattle - application of innovations in dairy farms	31
M. Mozere	Next-generation sequencing analysis pipeline	32
J. Oreha	The assessment of genetic diversity and structure of Vendace ( <i>Coregonus albula</i> (L.)) populations in Latvian Lakeland	33
E. Pärna	Genetic aspects of milk coagulation properties	34
A. Ragauskas	Analysis of the genetic structure of the European eel ( <i>Anguilla anguilla</i> ) using the mtDNA <i>cyt b</i> molecular marker	35
I. Railienė	Adoption of AP-PCR Markers for Molecular Studies of populations of Imperforate St. John's-wort growing wild in Lithuania	36
I. Railienė	Assessment of genetic diversity of <i>Impatiens parviflora</i> DC. populations at inter simple sequence repeat loci	37
S. Rancāne	Current activities and challenges in breeding work with interspecific hybrids of perennial grasses	38
S. Rancāne	Obtaining <i>in vitro</i> tetraploid red clover ( <i>Trifolium pratense</i> L.) plants	39
I. Rashal	Detection of genetic diversity of model species for urban ecology studies	40
E. Rudaitytė	Molecular identification of <i>Sarcocystis</i> species from sika deer ( <i>Cervus nippon</i> ) in Lithuania based on <i>cox1</i> gene	41
T. Runnel	miR-10a controls the proliferation and inflammatory responses of human primary keratinocytes	42
V. Salteniene	MicroRNA expression profiling in gastric cancer	43
J. Sidorenko	NER enzymes maintain genome integrity and suppress homologous recombination in the absence of exogenously induced DNA damage in <i>Pseudomonas putida</i>	44
N. Škute	The genetic and morphological variations in populations of vendace ( <i>Coregonus albula</i> L.) as glacio relict <i>Salmonidae</i> fish in Latvian-Belarusian Lakeland	45
M. Tagel	Identification of genes affecting mutation rate in <i>Pseudomonas putida</i> by a novel papillation-based assay	46
H. Tamman	Stability of the GraA antitoxin depends on the growth phase, ATP level and global regulator MexT	47
A. Teppo	The ability of <i>Pseudomonas putida</i> to colonize barley roots is regulated by reactive oxygen species	48

K. Ukkivi	NER proteins are necessary to maintain genome integrity in <i>Pseudomonas putida</i>	49
E. Urgard	Delivery of miR-146a mimics with PepFect6 inhibits inflammatory responses in keratinocytes and skin	50
S. Viggor	Occurrence of diverse alkane hydroxylase <i>alkB</i> genes in indigenous oil-degrading bacteria of Baltic Sea surface water	51
R. Vilcinskas	Variance at simple sequence repeat loci of Lithuania populations of <i>Juniperus communis</i> L.	52
K. Valk	Growth analysis and gene expression profiling of in vivo GBM xenografts transplanted into rats brain, targeted by CED and IP injection with bevacizumab, cetuximab and both	53
M. opik	High genetic variation of the main metagenomics markers of arbuscular mycorrhizal fungi (Glomeromycota)	54
